Lester, PA 19113-2090

RE: Proposed Remedial Action Plan Summary for:  
PCB Contaminated Soil at Allen Harbor Landfill - Sta. 12+00 to 17+00  
NCBC Davisville, Rhode Island  
Submitted 12 February 1999, Dated no date

Dear Mr. Otis;

The Rhode Island Department of Environmental Management, Office of Waste Management (RIDEM) has reviewed the above referenced document and comments are provided below:

1. Please provide detailed construction drawings of the proposed changes to the northern end of the landfill including, but not limited to grading, revetment details, drainage etc.
2. The final soil cap cannot contain soil which is excavated as a result of this remedial action since only PCBs will be sampled for and not other potential contaminants of concern.

If you have any questions or require additional information please call me at (401) 222-2797 ext.7138.

Sincerely,

Richard Gottlieb, P.E.  
Principal Engineer
